- *Bluetooth®* connection for mobile phone
- 3-Year warranty

The Jabra BIZ 2400 USB headset is the PC optimized member of the comprehensive family of Jabra BIZ 2400 high-end corded headsets from Jabra. This particular headset is configured for PC-based IP telephony and delivers pure Hi-Fi audio quality with multimedia applications. The Jabra BIZ 2400 Series features a cascade of improvements that pushes the envelope for the levels of audio quality, comfort and durability necessary for dealing with the special requirements in contact center and office environments.

BETTER AUDIO

Hand-made Neodymium speakers provides users with a superior audio experience in full Hi-Fi quality (80–16,000 Hz). The noise-canceling microphone effectively blocks out unwanted noise from the work environment, and the built in IntelliTone technology protects users from acoustic shock and ensures full compliance with the strict noise-at-work regulations in force in EU countries.

BETTER BUILD

The Jabra BIZ 2400 Series is designed to ensure maximum service life and minimum maintenance costs. Key details are made of surgical steel, the cord is re-inforced with Kevlar.

BETTER COMFORT

Jabra BIZ 2400 USB is fitted with super-soft ear cushions and speakers to boost the audio experience. A control pad on the cord features a toggle wheel for volume control, answer/end call buttons, plus two programmable soft buttons. And the built in *Bluetooth®* connection enables users to switch between softphone and mobile phone calls.

Jabra BIZ 2400 headsets are also available in narrowband versions optimized for traditional desk phones, and an IP variant for wideband IP hardphones.

FEATURES & BENEFITS

FEATURES	BENEFITS
Stereo sound in true Hi-Fi quality (80-16,000 Hz) for perfect audio and wideband VoIP	Optimum call clarity resulting in greater comfort and significantly less need to ask customers to repeat themselves. User can enjoy music in stereo Hi-Fi quality with the duo variant
Neodymium speakers provide exceptional sound clarity within the designated frequency response range	Better sound helps users understand what customers are saying, and help prevent irritating misunderstandings
Noise-canceling microphone	Technology filters out unwanted background noise so customers can clearly hear what users are saying, with less interference and background noise. This makes it possible to provide better customer service. Moreover, there is less need to place users in costly, space-demanding individual cubicles, and less need for sound proofing, etc.
2 fixed buttons, 2 programmable buttons and toggle wheel volume control	The user can answer and end phone calls simply by clicking call control buttons on the cord. Two buttons can be programmed from the computer to perform user-defined tasks such as "answer mobile phone call", "speak mute" or to comply with commands in future softphone. Volume can be controlled directly from the the toggle wheel
Jabra Multiuse Bluetooth® connection	User can switch seamlessly between PC-based IP telephony and mobile phone calls
Elegant design in strong materials such as Kevlar and surgical steel, intended for intensive use by many different employees	Long service life, with a minimum of faults and breakages. This helps avoid productivity losses, saves on equipment purchases, and cuts down on service/maintenance costs
Supersoft ear cushions	Enhances comfort and makes sure the earpieces fully enclose the ear. This helps users hear what is being said more clearly, and there is less distraction from surrounding noise sources
3-in-1 mono wearing styles: - Headband - Neckband - Earhook	Provides users with choice of favorite wearing style with speaker on preferred ear for optimum comfort and call clarity. The system makes it easy to swap between the different wearing styles. The headband features a T-bar specially designed to prevent it from getting tangled in your hair
FreeSpin boom in which traditional fixed wiring has been replaced with gold-plated slider contacts	Helps prevent breakages – a key issue in many contact centers and office environments
Sound Safety technology	Users are protected against sudden loud noises (PeakStop protection) transmitted over the telephone system and against high average sound levels (IntelliTone), which can result in hearing damage. Jabra BIZ 2400 USB offers full compliance with the strict noise-at-work regulations in force in EU countries
Extended 3-Year warranty	Protects headset investment by adding a full year to GN Netcom's standard warranty
Operating system support - Windows XP (latest service pack) - Windows Vista (32-bit, 64-bit) (latest service pack) - Windows 7 (32-bit, 64-bit)	Works with all major operating systems

SAFETY

The Jabra BIZ 2400 meets the electric strength test and impulse test requirements of the international standard IEC 60950-1. It also meets EN 60950, AS/NZS3260 and UL 60950 standards.
